

GHANSHYAM CHOUDHARY

Indore, Madhya Pradesh, 452010

+91-9009465869 — ghanshyamchoudhary9009@gmail.com — LinkedIn — GitHub — LeetCode — Portfolio

Education Qualification

Bachelor of Technology in Computer Science and Engineering
RGPV University

June 2021 - May 2025
Indore, Madhya Pradesh

Secured a CGPA of 7.6.

Work Experience

Software Developer Intern
Cygnus Capital

January 2025 - Present
Onsite

- Developed and maintained backend services to support real-time trading operations and live data processing.
- Integrated third-party trading APIs to streamline live market data and ensure accurate data handling.
- Worked with AWS services like Lambda and ECS to deploy scalable services container management.
- Collaborated with the team to enhance system security and reduce operational risks.

Python Developer Intern
ListApp Pharmatech Pvt. Ltd.

July 2024 - August 2024
Indore, Onsite

- Engineered an invoice recognition system using OCR and NER, improving data processing speed by 40%.
- Optimized data pipelines to enhance processing efficiency and application speed.
- Participated in weekly code reviews, ensuring adherence to clean coding practices and project deadlines.

Technical Skills

Languages: C, C++, Python, HTML, CSS, JavaScript
Frameworks: React, Node.js, Express, Next.js, OpenCV
Tools: Git, VS Code, Netlify, Render, Google Colab
Databases: MySQL, MongoDB, NeonDB, DynamoDB
Cloud: AWS, Lambda Functions, ECS, CI/CD Pipelines, Docker, S3
Services: Microservices, API Integrations, API Gateways

Projects

SAR Image Colorization using GANs and CNN
Python, TensorFlow, GANs, CNN

GitHub

- Developed a deep learning model to colorize SAR images, leveraging GANs and CNNs for high accuracy.
- Improved interpretability of SAR satellite data through automated image enhancement and colorization.
- Trained and tested the model on custom datasets, achieving visually consistent and realistic outputs.

QuillAI
React, JavaScript, MongoDB, Stripe API

GitHub

- Developed an AI-powered content generation tool integrating OpenAI's GPT API.
- Implemented Stripe for secure payment processing, enhancing monetization capabilities.
- Enabled user authentication and personalized workspace for saved content and preferences.

Income Tracer Application
HTML, CSS, JavaScript, React, MongoDB

GitHub

- Created a financial tracking app with authentication and real-time data visualization.
- Built interactive dashboards for monitoring expenses and budgeting.
- Integrated CRUD operations with user-specific data storage and dynamic charts.

Achievements & Certifications

Full Stack Development Bootcamp - Udemy.
Machine Learning Specialization by Andrew Ng - Coursera.
Image Processing with Python - Coursera.
Enrolled in Deep Learning Specialization - Coursera.
Achieved a highest LeetCode rating of 1422; solved over 700 coding questions.
Won MUN competition, demonstrating strong teamwork and communication skills.
